FUTURE COMPUTING 2017, February 19 - 23, 2017 - Athens, Greece

The Ninth International Conference on Future Computational Technologies and Applications

<http://www.iaria.org/conferences2017/FUTURECOMPUTING17.html>

Recent advances in computing environment provide users with not only great convenience but also increased risks that valuable information will be lost, stolen, changed, or misused. Also, this risk extends to emerging systems of all kinds, including large-scale distributed systems, control systems, and embedded systems and it encompasses systems with hardware, software, and human components.

Although attacks and defenses have been made for improving traditional security and privacy, the fast changing computing systems are always new and require research to solve many challenges.

#### **Topics of interest include, but are not limited to:**

- Authentication and Access Control
- Cloud/Big data security and privacy
- Computer forensics
- Security architectures
- IoT/Embedded systems security and privacy
- Mobile computing security
- Network security
- Trusted computing
- Runtime attacks and defenses
- Operating system security
- Web security
- Storage Security
- Security and Privacy in emerging computing system

#### **Important Datelines**

- Inform the Chair: As soon as you decided and secured the financial support
- Submission: January 15
- Notification with comments for camera-ready: January 25
- Registration: February 5
- Camera ready: February 8
