along with

**HEALTHINFO 2017**, October 8 - 12, 2017 - Athens, Greece

The Second International Conference on Informatics and Assistive Technologies for Health-Care, Medical Support and Wellbeing

<http://www.aria.org/conferences2017/HEALTHINFO17.html>

Mobile Healthcare (mHealth) offers unique opportunities to reduce cost, increase efficiency and improve the quality and access to care. It enables patients and physicians to have immediate access to medical records and vital signs, while wireless technology allows physicians to serve more patients despite geographical limitations.

In this context, the track will explore the emergence of mHealth in the healthcare setting. It will focus on the broad range of technologies available, tackle the effects of mHealth on the industry and stakeholders, explore the infrastructure and architecture needed to support these technologies, discuss the involvement of various stakeholders and the impact of mHealth on existing technology, and analyse the transformation of the business models. Looking forward, it will demystify the impact of consumer-centric healthcare, and how it might reshape access, quality, and treatment.

Submissions are encouraged from all areas of practice relevant to HEALTHINFO 2017.

### Topics include, but not limited to:

- Potential of mHealth
- Market potential of mHealth
- Business modeling for mHealth
- Data Protection and Security of data in mHealth
- Big Data and mHealth
- Mobile Telemedicine
- Practical applications of mHealth

- The legal framework of mHealth
- Quality and mHealth
