along with

**SECURWARE 2017**, September 10 - 14, 2017 - Rome, Italy

The Eleventh International Conference on Emerging Security Information, Systems and Technologies

<http://www.iaria.org/conferences2017/SECURWARE17.html>

The ESCA track on Emerging Solutions for Continuous Authentication solicits contributions that address and provide insights into the state-of-the-art solutions for continuous authentication. With the tremendous increase in the use of mobile devices and wearables, there is a surging demand for authentication and access control of mobile users. Indeed, one of the main security challenges nowadays is frictionless continuous authentication of users with high accuracy and security using contextual and biometric information such as, user behavior, context, location, proximity and interconnectivity among devices, etc., without causing privacy concerns. Contributions to this track should address the key challenges that are associated with frictionless continuous authentication, and advance research in this direction.

#### **Topics include, but not limited to:**

- Privacy-preserving authentication of mobile users
- Novel authentication solutions based on biometrics
- Flexible multi-modal authentication solutions
- Collaborative authentication
