Land Use/Cover Change (LUCC) is increasingly acknowledged as a significant environmental, economic and social challenge. LUCC modeling is essential to understand the potential drivers and consequences of the LUCC.

The special track of the Land Use Changes Geo-analysis Models (LUC-GM) encourages scientists and stakeholders from various connecting fields to share information on LUCC modeling approaches, to setup efficient strategies for local/regional land use, spatial planning, and environmental policies.

Topics include, but not limited to:

- Land use/cover change modeling,
- Drivers and consequences of land use/cover changes,
- Land use/cover dynamics at the cross-border region scale.

Contribution Types

- Regular papers [in the proceedings, digital library]
- Short papers (work in progress) [in the proceedings, digital library]
- Posters: two pages [in the proceedings, digital library]
