Students in first-degree courses begin the practical laboratory work with little previous experience. The rapid development of network and multimedia technologies offers new ways of learning that complement or provide an alternative to traditional learning, in the form of master classes and laboratory experiments.

Computer Aided Instruction (CAI) programs, Simulation programs, Intelligent Computer-Aided Instruction, or Intelligent Tutoring System are some of the multiple possibilities that offers the new technology.

All the topics related to these emerging research fields are welcome in this special track.

- Simulations
- Network applets
- Virtual labs
- Virtual Reality Laboratories (VRL)
- Laboratories Controlled by Distance (Remote Labs)
- Mobile virtual labs
- Other topics related to online learning
