VISUAL 2019, The Fourth International Conference on Applications and Systems of Visual Paradigms
June 30, 2019 to July 04, 2019 - Rome, Italy
https://www.iaria.org/conferences2019/VISUAL19.html

By using intelligent digital resource allocation, companies are able to reduce production times and up-scale their services. However, within this environment, IoT (Internet of Things)-ready sensors and smart home devices are significantly increasing the amount of data being generated. As such, understanding data in real-time is an incremental challenge; as it is forecast that by 2020 the amount of data in existence will surpass 44ZB.

Yet, visualising complex data facilitates a more comprehensive stage for conveying knowledge. Visualising and understanding these complex datasets is a significant challenge for the future, necessary to answer complex questions in a clear and understandable manner.

Topics include, but not limited to:

- Data Visualisation
- Real-time Data Analytics
- Data Mining
- Intelligent Data Analytics
- Digital Resource Visualisation
- IOT System Visualisation
- Emerging Big Data Analytics Challenges
- Data Visualisation in Healthcare
- Data Visualisation in Industry
- Applications of Augmented Reality
- Applications of Virtual Reality

Important Datelines
- Inform the Chair (see Contacts below): as soon as you decided to contribute
- Submission: May 4, 2019
- Notification: May 24, 2019
- Registration: June 3, 2019
