

Dominic P. A. Greenwood

Dr. Dominic Greenwood is Vice President of Telecommunications Systems at Whitestein Technologies AG, in Zürich Switzerland. His business division focuses on products concerning seamless mobile broadband technologies and business process management for telecommunications companies.

Dr. Greenwood is an IT business and technology leader with 15 years of experience in bringing the latest technology innovation to bear enterprise software products across several industry domains including logistics, telecommunications, and business process management. Areas of research focus include distributed intelligent systems, machine decision support and learning, ubiquitous computing, autonomic control and optimization, and emergent systems.

Dr. Greenwood was previously a Member of Research Staff in the Network Agent Research group of Fujitsu Laboratories of America, Inc., based in Sunnyvale, California. Prior to this he held the position of Senior R&D Engineer with Fujitsu Telecommunications Europe Ltd. in the United Kingdom.

Dr. Greenwood holds a Ph.D. in advanced communications systems, specializing in the application of cognitive algorithms to non-linear problems in the telecommunications domain. He has authored several software standards and international research collaboration proposals, plus led resulting projects. He has published more than 60 peer-reviewed research papers, filed several patents, and been awarded multiple industrial research achievement awards. He regularly serves on the editorial board of international journals, and contributes to international conference program committees. He is a Member of the IEEE.

He is in the Editorial Advisory Board of the International Journal On Advances in Intelligent Systems, ISSN: 1942-2679, in different IARIA Advisory Committees and published in and chaired some of IARIA conferences.
