

## Sébastien Tremblay

Director of the Joint Research Unit in Urban Sciences

Full professor, School of Psychology, Laval University, Canada

Director of the Co-DOT laboratory, Laval University, Canada

Honorary professor at Cardiff University, UK

Visiting professor at the National Higher Institute of Aeronautics and Space (ISAE) of Toulouse, France

Sébastien Tremblay received his Ph.D. in Psychology from Cardiff University (1999) and completed a postdoctoral fellowship from a partnership between Cardiff and the Defence Evaluation and Research Agency (DERA ; now QinetiQ). He is a Professor at Laval University, the founding member of the Co-DOT lab ([www.co-dot.ulaval.ca](http://www.co-dot.ulaval.ca)), an Honorary Professor at Cardiff University, UK, and the Director of the Joint Research Unit in Urban Sciences ([www.umar-su.com](http://www.umar-su.com)) – a consortium of academic, industrial and government partners teaming up in a joint R&D initiative to create innovative and smart solutions to emerging city challenges. His research program is centered on human interactions with technologies, and the main goal is to maximize human performance and quality of life in a wide range of domains such as security, transportation, emergency medicine, education and entertainment. From a cognitive science perspective, he has contributed to the development of intelligent systems in those domains.
