The Road Ahead

Positioning case study (autonomic computing!)

Revitalizing old technologies

Technology barriers

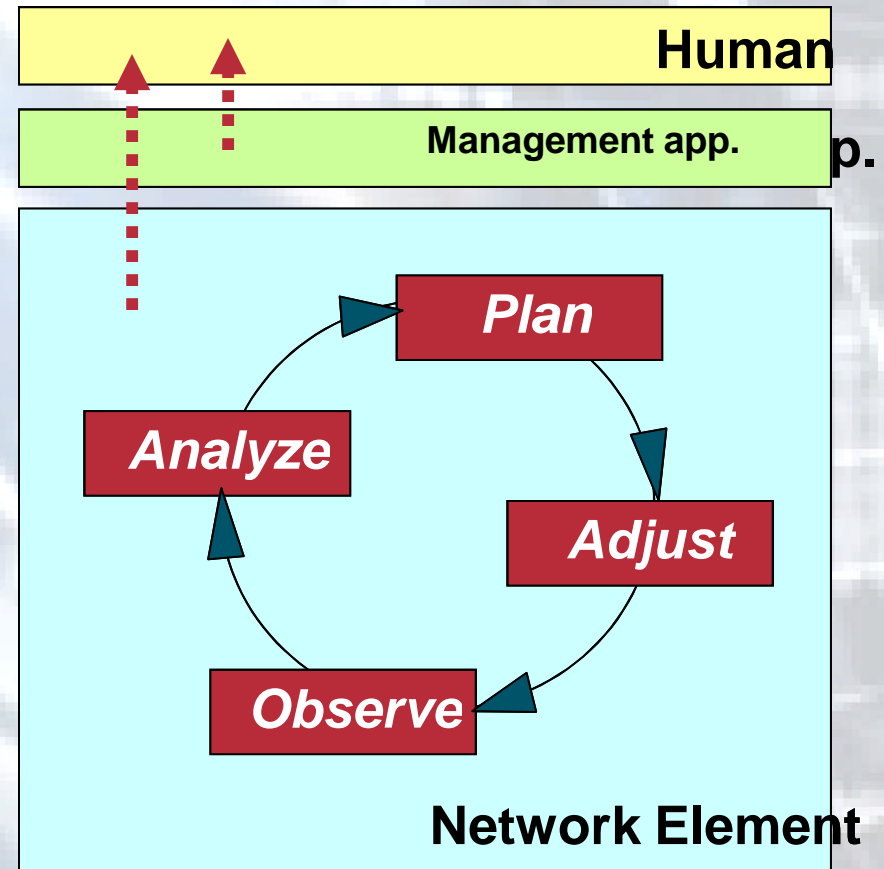

Trends

Technology Lifecycles

Autonomic computing

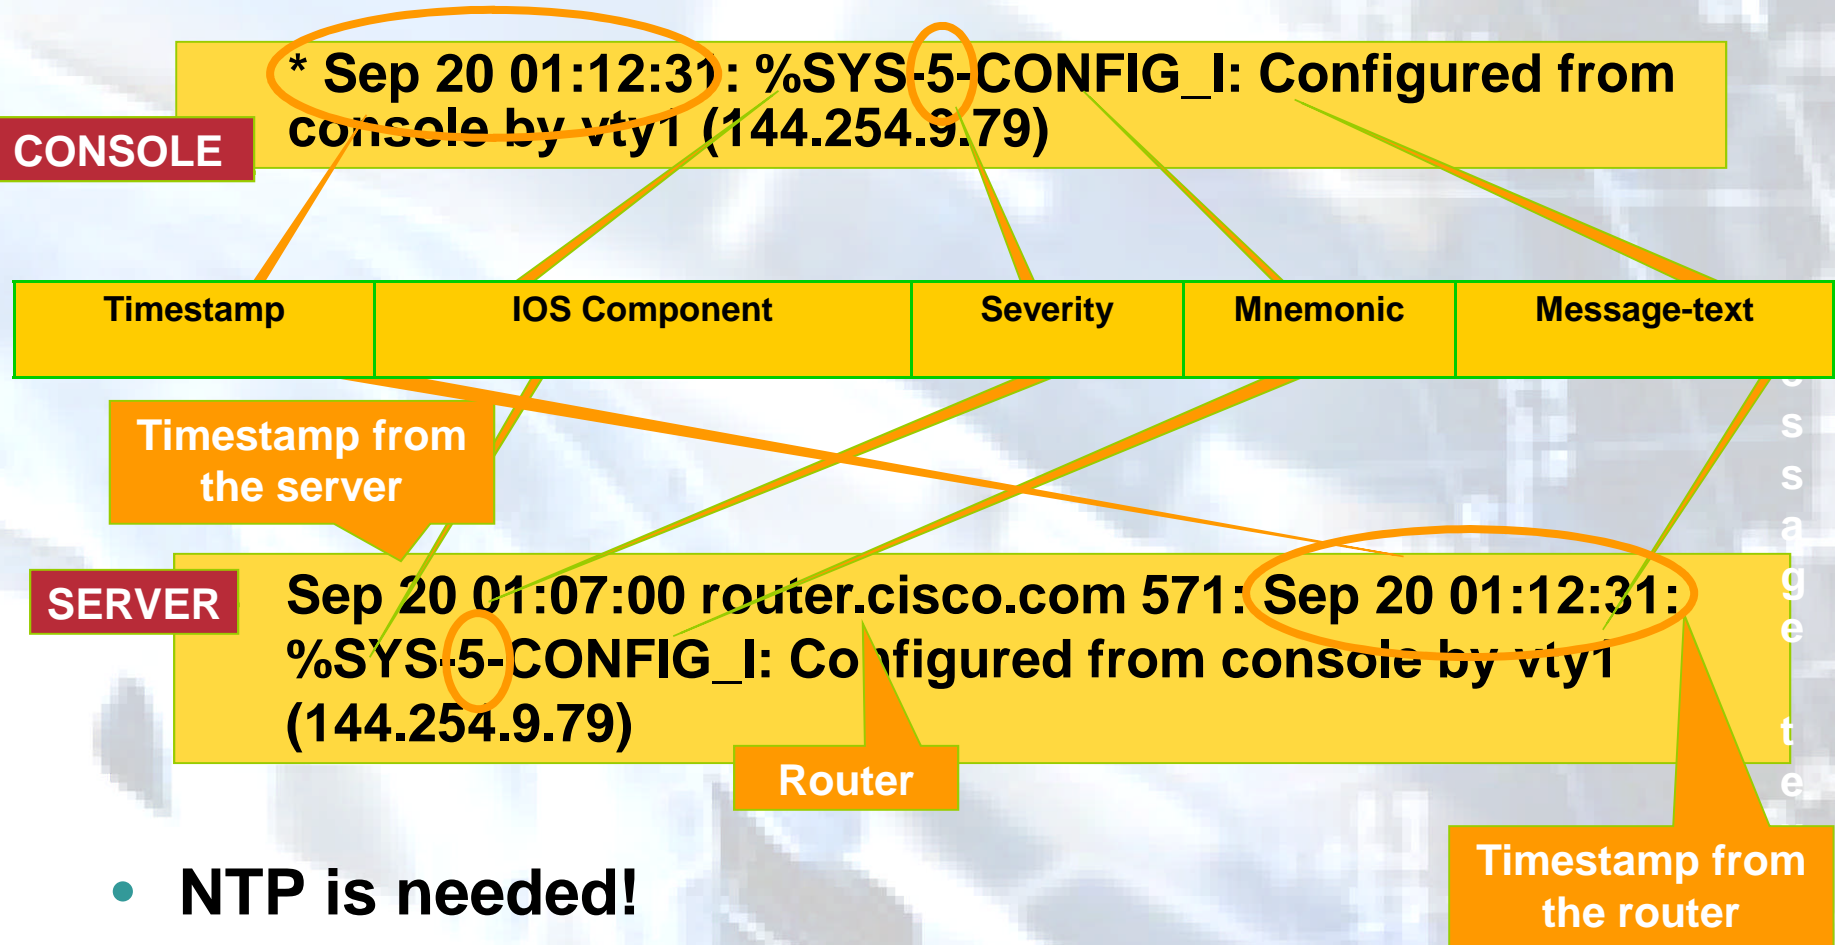

- **Case study**

Autonomic Computing

(a) Typical management control loop (b) Closed management control loop in autonomous network

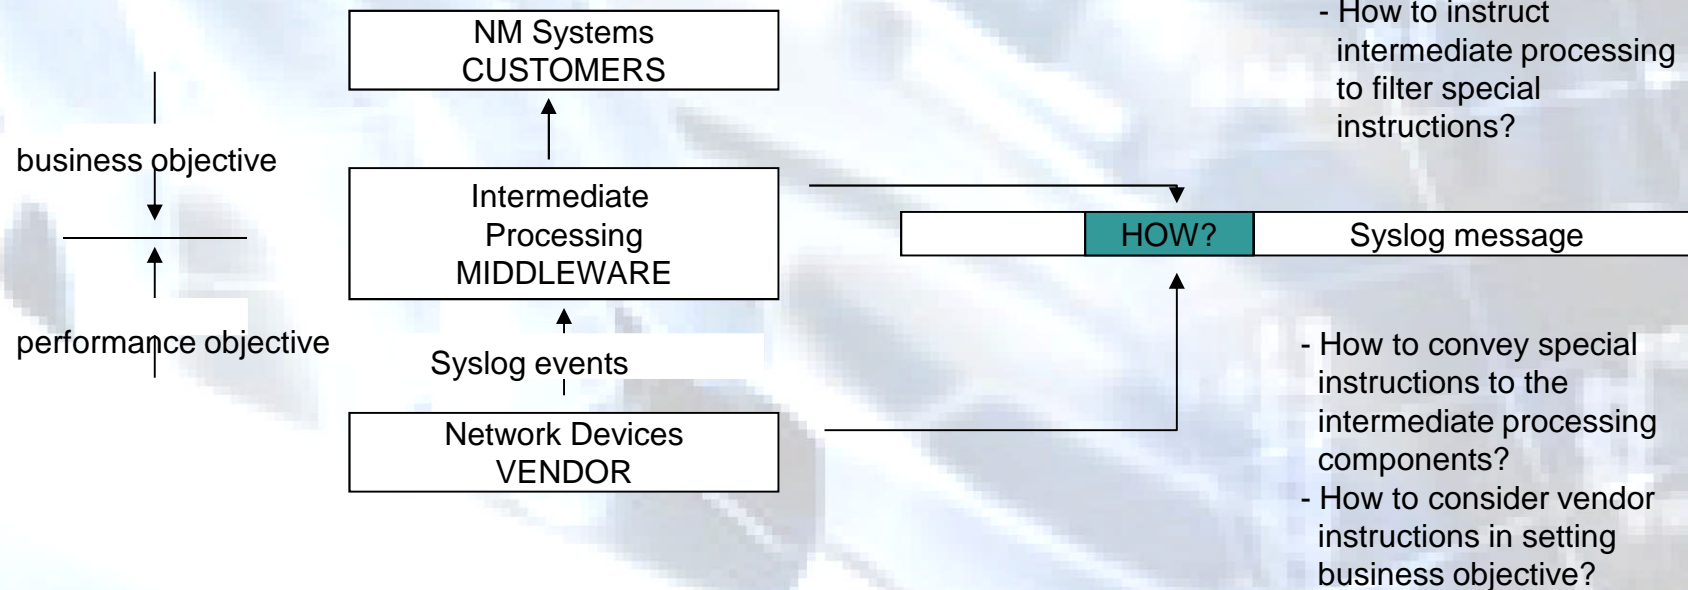

Syslog Message "Body" Format in the IOS

- **NTP is needed!**
- **Header:level can be different than Body:severity**

Semantic Issues

- Naming
- Context-defined
- Smart events

Revitalizing old technologies

- **Human ear recognition (biometrics)**
 - **Tape storage (vs. online digital)**

Ear Biometrics

<http://www.cse.msu.edu/~cse891/Sect601/textbook/13.pdf>

1880: Alphonse Bertillon, Police, France: anthropometry (all body parts)

1906: R. Imhofer, Physician, Check Republic, 500 ears-> four features

1960: C. Fields et al.: 206 sets of ears of newborn babies

1948-1962: Alfred Iannarelli, 12,000 individuals, 12 different geometric measurements of the ear based on crus and helix (1964)

→2D + 3D (richer than 2D)

→(Computer, November 2011, p. 79)

Tape storage (vs. online digital)

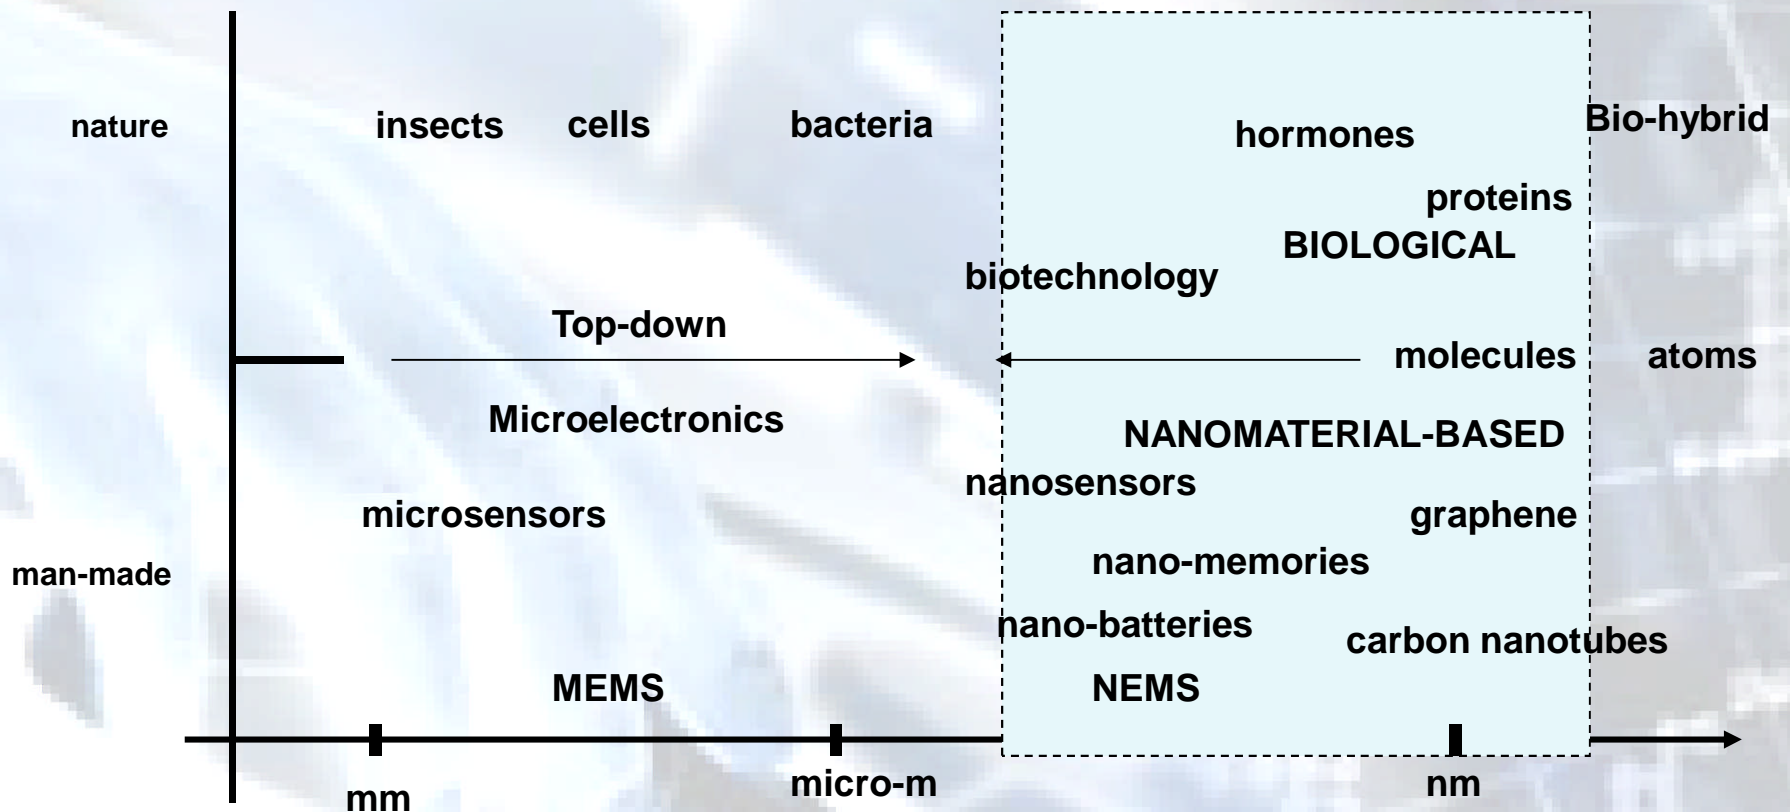

- **Storage strategies**
- **Long-term storage**
- **Offsite storage**
- **Regular backups**
- **Case study**
- **Google: lost Gmail information in the Spring of 2011**
 - ! Multiple copies of data in data centers; software bugs affected them, all
 - ! Tapes are offline; no software bugs
- **? Anything that is disk-based and based on replication, including cloud-based storage, requires that the data be transferred to another disk.**
- **PC, October 2011, vol. 9, Iss. 10, pctoday.com**

Technology barriers

- **Nanoscale limits**
- **Computation resources**

Nanoscale limits

- Nanotechnology

from: Nanonetworks: A New Frontier in Communications by Ian F. Akyildiz, Josep Miquel Jornet, and Massimiliano Peirobon
Communications of the ACM, 11/2011, Vol. 54, no. 11, p. 84

Computation resources

- Chaotic Planet
- Extreme-weather prediction: new weather models + modeling technologies
- Currently: Central prediction models
- Tendency: Ensembles of (slightly different) models

- Quotes: Steve Koch
- NOAA: “We don’t have one gigantic model that solves all the problems”
- “Getting to the point where s are able to produce 60-minute warnings for extreme weather will be a major undertaking that require enough computing power to run fine-scale ensemble models at an operational level”

from: Modeling Chaotic Storms, by Kirk Kroeker
Communications of the ACM, 11/2011, Vol. 54, no. 11, p. 14

Trends

- **Data analytics**
- **Computational journalism**
 - **Social networks**
 - **Deep Web**
- **Distributed Artificial Intelligence**
 - **Brain-computer interfaces**
 - **Natural-search interfaces**
 - **Organic displays**
- **Anonymity versus cyber-threats**
 - **....**

Technology Lifecycles

- FSM, FA TL TLA, Process Algebra →
- Reactive/proactive/adaptive/predictive/bio-... →
- Social/semantic/analytics →

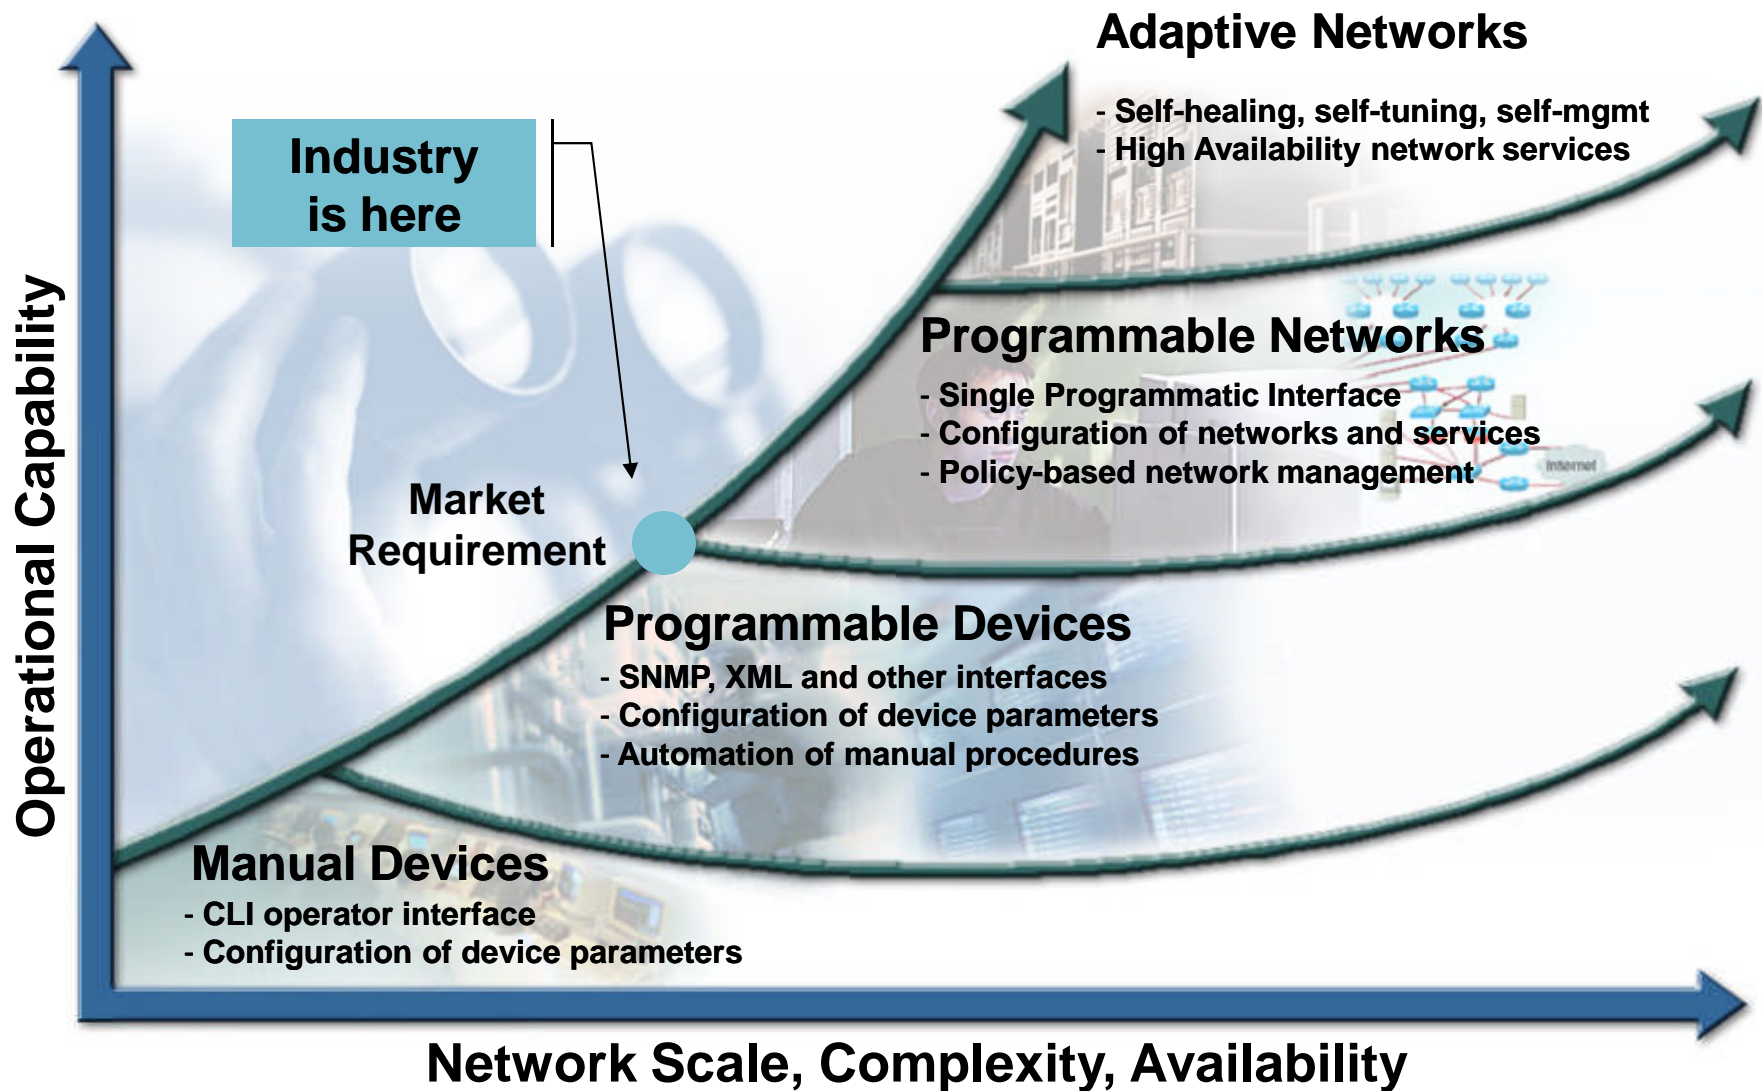

- WiFi/Mesh/P2P/LTE →
- Agents/OO/aspects/scenario →

- Performance/energy/unpredictability →

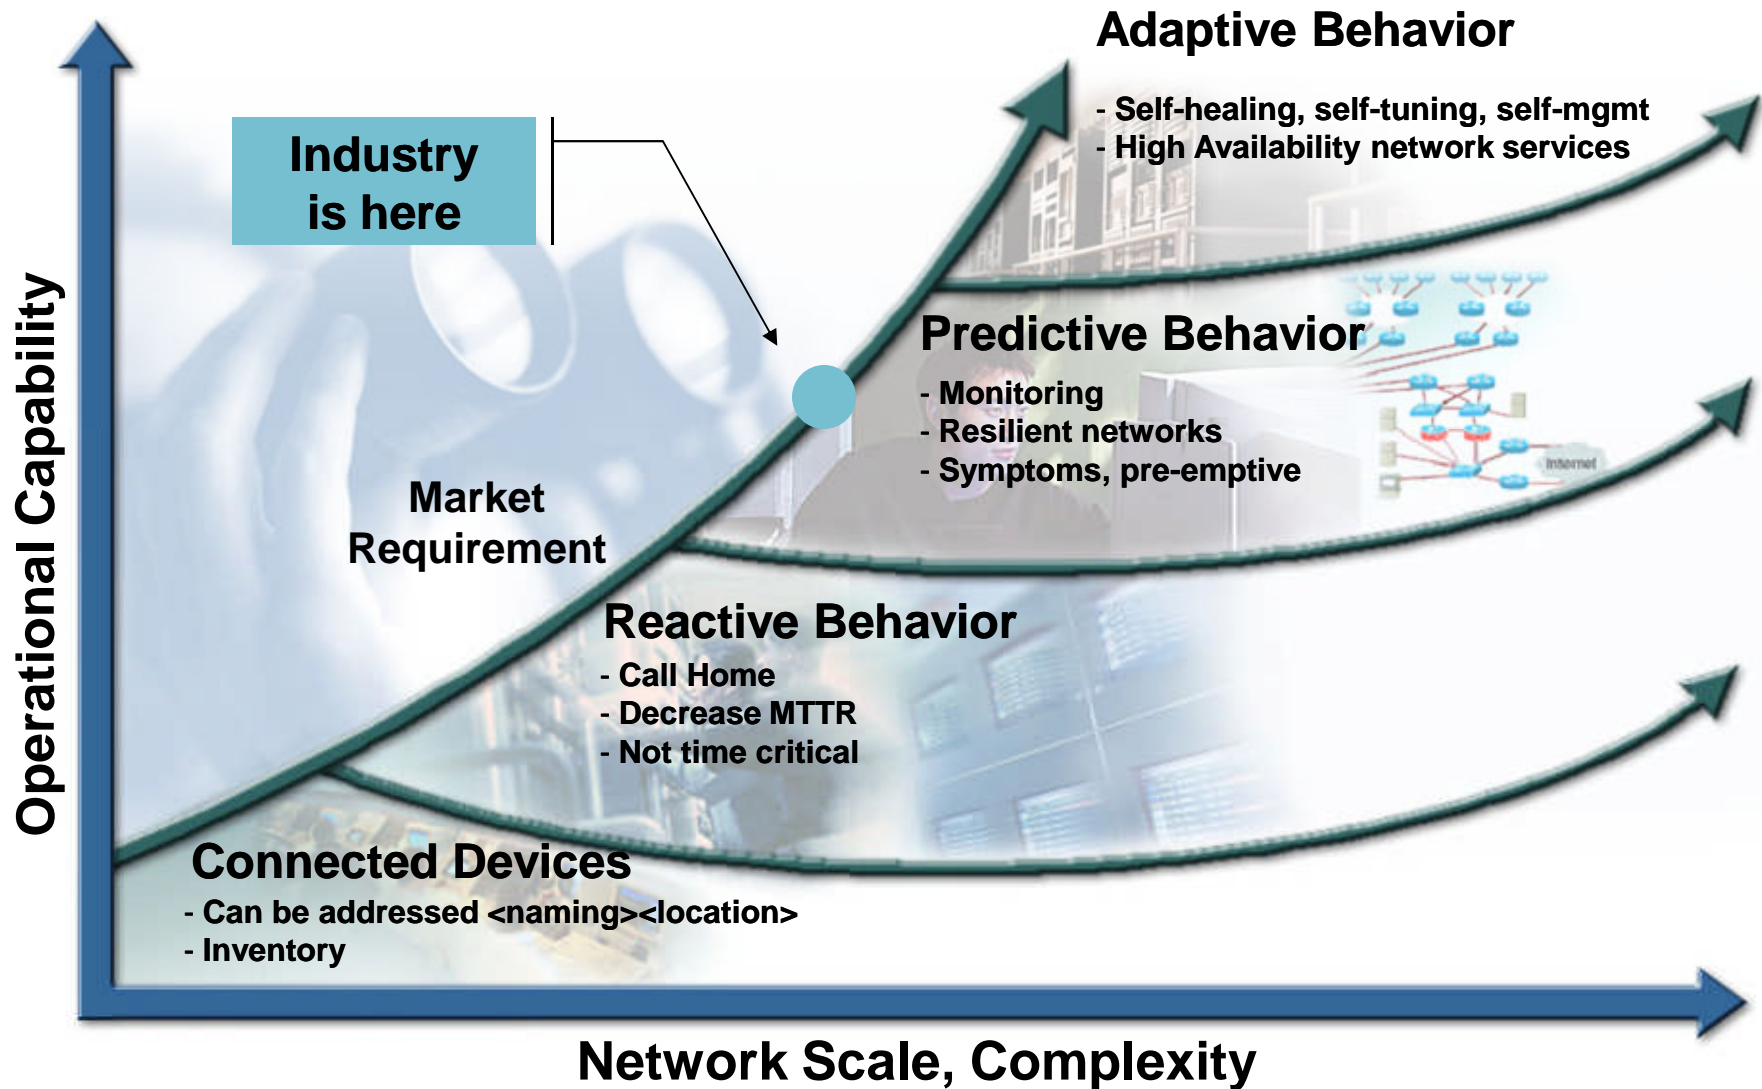

Technology tendencies

Evolution of Network/System Manageability

Evolution of System Intelligence

Gartner Hype Curve 2010/2011

Figure 1 Hype Cycle for Emerging Technologies, 2010

Source: Gartner (August 2010)

Yet to come: Grocery Club Cards as PIs

- **Public health**

 - Food-borne illness outbreaks

 - 1987: epidemiologists / scam food purchase for culprits in food illness episodes

 - Customer food history → privacy

- **Case#1 [2011]**
- **Salmonella; 5 Eastern states, 42 people, hospitalization**
- **Shopping at Wegmans supermarket: Buying bulk Turkish pine nuts**
- **Case#2 [2010]**
- **E.coli O157:H7, 33 people, 33 people, 15 hospitalizations**
- **Shopping: raw milk Gouda cheese, produced by Bravo farms, Traver/California, usign Cotsco purchasing data**
- **Case #3 [2009]**
- **Salmonella: Montevideo, sicked 272 persons, 44 states,**
- **Shopping: Cotsco: salami from Daniele Inc.
! Not sausages, but the black and red peeper they were coated with the bacteria**

Challenge for you / invitation for project proposals

- **Project #1**
- **Napkins notes: semantically inserted in a knowledge database**

- **Project #2**
- **Instant alerts: phone number/URL + intelligent clothes + alerts + online healthcare/medicine order/**

- *? Multi-state systems (cross-country interoperability)*
- *? Multi patient record formats (privacy, too!)*
- *? Legal barriers (much more complicated as thought!)*

- petre@iaria.org

Open discussion

- **Stage is open!**
- 😊 **Thousands of Robots for Advertising teams**
