- Future work
- Conclusion

Goal

Goal

SegNet

- Computer Vision and Robotics Group
- Targets are transportation
- Tutorial
 - 480x360 pixel
 - 367 images
 - 40000 times of learning

SegNet

- 480x360 pixel
- 1600 images
- 80000 times of learning

Result of SegNet's

Result of SegNet's

- **Goal:** to count up all shoots in each branch
- **The problems (issues)**
- **Idea**
- **System**
- **Discussions**
- **Future work**
- **Conclusion**

The problems (issues)

The problems (issues)

- **Goal:** to count up all shoots in each branch
- **The problems (issues):** overlap and misrecognition
- **Idea**
- **System**
- **Discussions**
- **Future work**
- **Conclusion**

Idea : 3 steps to solve issues.

- **1, Management by ID**
- **2, Remove minor misconceptions**
- **3. Expansion of the area**

1: Managed by ID

1: Managed by ID

2 : Remove minor misconceptions

3. Expansion of the area

- Extend the area of branches and shoots
 - - Detecting areas of segment leakage
 - - Detection of areas dissected by treetops
 - - Detection of areas separated by branches
- Size to be enlarged is the thickness of the branch

3. Expansion of the area

3. Expansion of the area

- **Goal:** to count up all shoots in each branch
- **The problems (issues):** overlap and misrecognition
- **Idea:** 3 steps
- **System**
- **Discussions**
- **Future work**
- **Conclusion**

- **Goal:** to count up all shoots in each branch
- **The problems (issues):** overlap and misrecognition
- **Idea:** 3 steps
- **System:** success
- **Discussions:**
- **Future work**
- **Conclusion**

Discussions

Future work

- **Goal:** to count up all shoots in each branch
- **The problems (issues):** overlap and misrecognition
- **Idea:** 3 steps
- **System:** success
- **Discussions:** discover new challenges
- **Future work:** connect 100 images
